# Computer Labels

Steam process labels complying with EN ISO 11140
Providing rapid and confident assurity of sterilisation

Product Code: 15.100.180

The surface material of these labels is water and moisture repellent, resistant to high temperatures without shrinkage all whilst protecting the embedded indicator.

The adhesive used is proven to be skin friendly,
is certified by Reach & ROHS and has been tested up to 134°C for 18 mins.

The chemical indicator complies with EN ISO 11140 -1, is tested by an independent laboratory and is free from heavy metals and harmful chemicals.

The integral steam indicator gives theatre staff clear indication that the contents of the package or container have been steam sterilised and if the parameters have been met.

Our Famos computer label range comprises thermo transfer print labels
and pin wheel print labels; used for marking trays and containers
with the ability to display any data field of choice.

The embedded indicators give a clear and easily referenced indication
as to whether the container, tray or contents have been sterilised.

Computer labels are also available for ethylene oxide (EO) and formaldehyde (FORM) sterilisation processes and are also guaranteed latex free and are available
in single or double adhesive strength.
